NHC 5 STAR FACILITY

## Administration

**Zach Anderson**  
Administrator

**Tim Francis**  
Director of Nursing

**Bev Hampton**  
Office Manager

**Jessica Brooks**  
Marketing & Admissions Director

**Natalie Mucci**  
Social Services Director

**Ryan Young**  
Health Information Manager

**Michael Barton**  
Wellness Director

**Jeff Lind**  
Food Service Manager

**Scott Forsythe**  
Maintenance Manager

**Brandon Klinsbeck**  
Environmental Services Director

**Dr. Taylor Dittmann**  
Rehab & Therapy Director

## XXIII Winter Olympics

From February 9–25, the world's greatest athletes will compete for gold medals and glory at the XXIII Winter Olympics. South Korea will host the winter games in Pyeongchang, a city in Gangwon Province, high in the Taebaek Mountains of the north.

Chief among the battles to play out on snow and ice will be the contest for men's hockey gold. For the past five Winter Olympics, players from the National Hockey League have participated in the Olympics. This year the NHL is not building a break into its schedule to allow players to compete in the Olympics, a matter that is not sitting well with the athletes. The USA hopes to compete with Russia, Canada, Sweden, and Finland for the coveted medal.

Elsewhere on the ice, Russia's 17-year-old Evgenia Medvedeva is favored for gold in women's figure skating, but 17-year-old American Karen Chen is an up-and-coming phenom who might surprise the world. On the men's side, American Nathan Chen could take gold if he continues to impress with innovative new jumps.

On the slopes, Americans Lindsey Vonn and Mikaela Shiffrin are poised to make a run for gold in downhill skiing. Shaun White, red-haired maestro of the snowboard half-pipe, has been a fan favorite since he took gold in 2006.

Canada took gold in men's and women's curling in 2014. Will they repeat? While Germany swept all luge events in the Sochi Olympics, the Austrians will provide stiff competition this time. In bobsleigh, Nigeria will attempt to field its first-ever team as three former women's track stars introduce the cool sport to the African continent. And beyond sports, South Korea is introducing innovative technological advances to the Olympics—virtual reality will change the way we watch the games. These Winter Games are sure to offer both sport and spectacle.

## Walk Amongst the Stars

On February 8, 1960, Hollywood, California, revealed an innovative new marketing technique designed to memorialize the glitz and glamour of Hollywood:

the Walk of Fame. E.M. Stuart of Hollywood's Chamber of Commerce pitched the idea for a star-studded walk in 1953. By 1956, the coral-and-charcoal-colored star design was approved, and two years later, in 1958, committees representing motion pictures, television, music, and radio had chosen 1,558 names to honor. Construction began in earnest in 1958, but two lawsuits delayed the project for two years.

In truth, eight temporary stars were laid at the corner of Hollywood Boulevard and Highland Avenue throughout the legal battles as a way to market the venture and demonstrate to the public how the Walk of Fame would look. These eight names were picked at random from the group of 1,558 and included: Joanne Woodward, Olive Borden, Ronald Colman, Louise Fazenda, Preston Foster, Burt Lancaster, Edward Sedgwick, and Ernest Torrence. The first permanent star wasn't affixed until March of 1960 after the legal disputes had been settled. It honored director Stanley Kramer. The remaining 1,557 were laid soon after.

Hollywood Boulevard suffered decline throughout the '60s, and another star, this one for producer Richard Zanuck, wasn't laid until 1968. Stars have been added continuously since, and today there are more than 2,600. Getting a star isn't easy... or cheap. Extensive applications must be filed on behalf of nominees, and nominators must pay a \$40,000 construction and maintenance fee per star. Put that way, it costs a small fortune to maintain all of Gene Autry's five stars (one for each category, plus one for the additional category of theater and live performance, added in 1984). For some, a star is a dubious honor. Both Julia Roberts and Clint Eastwood have respectfully declined their nominations. But this doesn't stop 10 million fans a year from visiting.

## February Birthdays

In astrology, those born between February 1–18 are Water Bearers of Aquarius. They are creative and intellectual philosophers at heart, getting to the root of problems and using their energy and passion for the benefit of others. Those born between February 19–28 are born under Pisces. Friendly and selfless, they are always willing to help others with their hearts on their sleeves. Thanks to an intuitive understanding of life, Pisces make deep connections with other living beings.

**HAPPY BIRTHDAY!**

## Tip the Scales for Pangolins

February 17 is World Pangolin Day. What is a pangolin, you ask? It's one of the world's most unique animals. They are found in Africa, India,

and across Asia. Covered in scales resembling a pinecone, the pangolin looks like a cross between an armadillo and an opossum. When threatened, the pangolin curls up into a ball, gaining protection and defense from the hard, sharp scales. They even spray a noxious smell similar to a skunk. Like anteaters, these animals eat insects with long tongues that are longer than the pangolin's body when fully extended. Sadly, these unique qualities have made it highly desirable; it is the most illegally trafficked animal in the world. Poachers hunt and sell pangolins for their scales, skin, and meat. Efforts to save them often fall flat because pangolins are secretive and elusive animals with very specific needs. Perhaps one of the best ways to help save pangolins is to learn more about them. Once people meet these creatures, they can't help but love them.

## February's Feathered Friends

February is Bird-Feeding Month. During the cold, harsh winter, it is especially difficult for wild birds to find food, so everyone is encouraged to provide food, water, and shelter

to help birds survive, and birds do need our help. One-third of the North American overwintering bird population has declined since 1966. And one-third of all North American bird species are at risk of extinction, with birds in arid, grassland, and coastal climates at greatest risk. A little bit of winter seed to augment their daily catch of insects could be enough to get them to springtime nesting season.

Not only can you help birds by feeding them this February but simple observations conducted during the Great Backyard Bird Count (GBBC) from February 16 to 19 can inform scientists about winter bird populations. During this four-day event, participants can spend as little as 15 minutes per day identifying birds in their own backyards and submitting that list to scientists via [birdcount.org](http://birdcount.org). Last year, 160,000 birders participated, from amateurs to experts, creating a global snapshot of world bird populations. Since birds are always on the move, such counts are important for scientists to see where populations come and go, where certain species congregate, whether diseases are affecting birds in specific regions, how species are coping with habitat loss and pollution, and how weather changes are affecting populations.

Citizen science—the practice of regular citizens aiding scientists in their research—is an important part of ornithology. The more people who participate, the more data is gathered, and the more accurate a picture of bird health. Citizen science birding projects are not limited to February. From November through April, birders can participate in Project FeederWatch. Every fall, people gather in the mountains and hills to count migrating hawks and raptors. Journey North is an annual count of migrating hummingbirds during the spring. So grab your binoculars and field guide and get counting!

## Making Hearts Whole

February is Mend-a-Broken-Heart Month, and scientists are quick to argue that hearts can really be broken as a result of extreme grief or social rejection. Brain studies show a direct connection

between emotions and physical health. But the good news is that both can be mended. Heartbreak is often the result of feelings of loss after a breakup. Psychologists explain that spending time with a romantic partner causes your identities to become intertwined. Losing or being rejected by that partner, therefore, leads to feelings of confusion due to a loss of your sense of self. The best way to mend your heart is to become yourself again: exercise, try new hobbies, socialize with other people. All of these things will challenge you to rediscover your joys and fall in love with yourself all over again in the process.

### **The Tramp**

For many, Charlie Chaplin is known for his most memorable character, "the Tramp," a good-natured, bumbling vagrant. The Tramp made his big screen debut on February 17, 1914, in the silent film *Kid Auto Races at Venice*. The Tramp became an international icon of the silent era of film, and even when talkies became all the rage, Charlie Chaplin refused to speak while in character, most likely because the Tramp was supposed to be American and Chaplin had a British accent. What made the Tramp so beloved? Maybe it was his sharp social commentary during the turbulent era of industrialization. Maybe it was the Tramp's embodiment and support of the "American Dream." Or maybe it was that adorable moustache and cane. Whatever the reason, the Tramp is adored all over the world.
